

Southeastern Lumber Manufacturers Association and TradeTec Partnership

SLMA and TradeTec, an association member, have teamed up for an SLMA “member-only” discount for TallyWorks, TradeTec’s comprehensive software solution for the wood products industry.

TallyWorks provides the solutions that allow you to do so much more with less. Less time capturing information, less time entering the same data into multiple transactional documents, less time controlling your inventory, less time tracking your business and far more time expanding it based upon valuable, real-time information.

- **Standing Timber Management**
- **Log Procurement**
- **Sales Order Management**
- **Inventory Control and Valuation**
- **Integrated Handheld Computer Solutions**

Backed by our 24/7 Support Team and Software Assurance Program, TradeTec not only pledges system reliability but also ensures that it will never become obsolete due to evolution of technology. This is a powerful trait for a vendor providing a system that will become a critical part of your organizations infrastructure.

TallyWorks provides a Return on Investment of typically less than 1 year allowing you to run lean in tough cycles and have far more management information at your fingertips to seize opportunities as they arise.

For 25 years we have developed and enhanced the solutions that our customers utilize to become successful industry players!
